

# Gobinda Gagan Dey

## Full Stack Developer.

Disciplined individual with strong ownership mindset, committed to achieving goals with focus and consistency.

[gobindagagandey@gmail.com](mailto:gobindagagandey@gmail.com) || +91 9556185722 || [Gobinda.dev](https://Gobinda.dev)

## SKILLS

---

- **Programming Languages:** Java, JavaScript, HTML5, CSS3
- **Frameworks/Libraries:** React.js, Redux (Toolkit), Tailwind CSS, Node.js (Express.js), REST API Integration
- **Databases:** MongoDB, Mongoose, MySQL
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Swagger
- **Core Subjects:** Operating Systems, Database Management Systems, Computer Networks, OOPs, Software Engineering, Software Testing, Data Structures & Algorithms (DSA)

## INTERNSHIP EXPERIENCE

---

### Vanurtech media Pvt Ltd.

Backend Developer Intern

May 2025 – June 2025

- Developed and maintained the core **backend architecture** of a scalable social media application using **Node.js** and **Express.js**.
- Collaborated with a team of 4 to design and implement **RESTful APIs** for core user features, including registration, login, posting, likes, comments, and follow/unfollow.
- Implemented **JWT** authentication and password hashing with **middleware** to protect routes and manage user roles.
- Developed and optimized **MongoDB** schemas using **Mongoose**, resulting in a **20%** improvement in query efficiency and data consistency.

### Edu-Versity.

Frontend Developer Intern

April 2024 – May 2024

- Developed a **Student Attendance Management System** that improved tracking efficiency and reduced manual effort by **30%**.
- Designed a **responsive and scalable UI** using **Tailwind CSS**, ensuring consistent performance across devices and screen sizes.
- Built interactive UI components using **React** and **JavaScript** to improve user experience and reduce bounce rate.

## PROJECT

---

### CRYPTO TRACKER WEB APP

[\[Live-Link\]](#)

Tech Stack: React.js || JavaScript || Tailwind CSS || REST APIs || Framer Motion || Chart.js

- Built a crypto dashboard displaying real-time prices using the **CoinGecko API**.
- Implemented dynamic charts and animations to improve user engagement by **30%**.
- Integrated interactive **charts** with **Chart.js** for visual price analysis.
- Included features such as live market data, price fluctuation, market cap, and 24-hour volume change.

### Dev-Nest

[\[GitHub-Link\]](#)

Tech Stack: Node.js || JavaScript || Inquirer || chalk || npm

- Developed a CLI tool to scaffold clean **frontend** and **backend** directory **structures** for efficient project initialization.
- CLI tool that saves **30+** minutes per project by automating frontend/backend folder structure creation.
- Generated foundational folder structure for both frontend and backend, **auto-generating folders like client, backend, routes, models**, and more

## EDUCATION

---

B.Tech in Computer Science and Engineering | GIET University, Gunupur

2022- Present

12th | NIST Higher Secondary School, Balasore

2020-2022

## ACHIEVEMENTS / LEADERSHIP

---

- Participated in a university-level **hackathon**; collaborated on a **full-stack** solution in under 24 hours.
- Organized a **React** workshop for **50+** students under the Web EYE Club.
- Solved 100+ DSA problems on [LeetCode](https://leetcode.com) and [Code360](https://code360.in) to improve problem-solving and algorithmic skills.
